

Your clients' documents are full of 1961 references. AaykarSetu fixes that.

The Income Tax Act 2025 renumbers, merges, and renames hundreds of sections effective Tax Year 2026-27. AaykarSetu is a single-tab workbench — no login, no setup — that maps old to new, scans documents for stale references, and answers plain-English questions about the new Act.

The transition problem: Salary structures, agreements, audit reports, and ITR drafts still reference Section 80C, 194C, Form 16 and dozens of other 1961 designations. Catching every instance manually is tedious, error-prone, and billable time you shouldn't be spending.

FOUR TOOLS, ONE TAB

Section Mapper

Search any 1961 section — get its 2025 equivalent instantly. Shows change type (Renumbered/Amended/Merged/Deleted), plain-English summary, and monetary limit alerts.

Forms Mapper

Every TDS/TCS filing form — old number to new. Structural change notes and merged-form alerts to update your filing workflows for FY 2026-27.

Document Scanner

Upload PDF or DOCX — get colour-annotated output with every stale section reference and deprecated term flagged. Export corrected DOCX in one click.

AaykarMitra (AI chat)

Ask anything about the Act in plain English. RAG-powered answers cited directly to the actual sections of the Income Tax Act 2025.

BUILT FOR

- Practising CAs with individual & corporate clients
- Finance & accounts teams at SMEs
- Tax consultants reviewing salary structures
- Audit teams updating working papers for FY 2026-27

WHY IT SAVES TIME

- Client-side fuzzy search — results in under 200ms
- OCR fallback for scanned PDFs, no retyping needed
- Exports corrected DOCX with all replacements applied
- RAG answers grounded in actual Act text — not summaries
- Covers ITES, Deductions, Salary, Capital Gains & more
